## Professional Summary

Frontend-focused Software Developer with 5+ years of experience building and maintaining scalable web applications used by international teams and high-traffic platforms. I specialize in developing maintainable frontend systems using Vue.js, Nuxt, React, Next.js, and TypeScript, with strong foundations in semantic HTML, modern CSS, and accessible UI development.

I enjoy working on complex, long-lived systems where clarity, usability, and maintainability are critical. I regularly collaborate with backend engineers, designers, and product teams to translate ambiguous requirements into robust software solutions that support real-world workflows.

My experience includes API integration, frontend architecture, testing practices, CI/CD pipelines, and cloud infrastructure, and I'm comfortable working in fully remote, distributed teams.

## Professional Experience

### Quote.com

Front-End Developer

Remote (US)  
Oct 2024 – Present

- Develop high-performance interfaces using Vue.js, React, Nuxt, Next.js, and TypeScript.
- Contributed to migration from Nuxt architecture to Next.js improving maintainability.
- Built scalable landing pages supporting high-traffic acquisition funnels.
- Implemented A/B testing framework enabling experimentation and conversion improvements.
- Developed supporting Node.js services and maintained CI/CD with Vercel, GitHub Actions, and GCP.

### Stafford Capital Partners

Front End Developer

Remote (BR / UK / AU / US)  
Jan 2021 – Oct 2024

- Developed internal platforms using Vue.js and Vuetify supporting operational workflows.
- Built dashboards and visualizations using D3.js for complex financial datasets.
- Integrated REST APIs and aligned frontend logic with backend data models.
- Implemented unit testing with Jest and improved architecture maintainability.
- Managed cloud infrastructure with Terraform in Azure and CI/CD pipelines in Azure DevOps.

## Education

### Universidade Federal do Paraná

Bachelor's Degree in Computer Science

Curitiba, Brazil  
2017 – 2024

## Core Skills

**Frontend:** Vue.js, Nuxt.js, React, Next.js, TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind, Vuetify, D3.js

**Architecture:** Component systems, API integration, frontend performance, scalable UI systems

**Testing:** Jest, unit testing, refactoring, code reviews

**Backend / Infra:** Node.js, REST APIs, Google Cloud Platform, Microsoft Azure

**DevOps:** CI/CD, Docker, GitHub Actions, Azure DevOps

## Languages

Portuguese — Native

English — Fluent

Spanish — Basic
